

What We Will Not Do

As a reputable and responsible Adult Website design company, we will not do the following.

- We will not guarantee that you will get tens of thousands of visitors every day. Visitors will visit your site if they hear good things about it, and if it has regularly updated content they are interested in viewing

- We will not guarantee that you will be highly placed in the search engines. You will need to provide us with the key words, or search words and phrases you want to be listed under, and we will promote your site using these words. Remember that there are thousands of companies all trying to achieve the same results as you/us.

- We will not in any circumstances undertake any work which involves:
 - Children or animals in a sexual or violent context
 - Any form of abuse on grounds of age, race, religion or gender

 - We will also inform the relevant authorities if we receive any queries about creating such site, or find that any site we have created has been modified to include such material in the future.

- Sites showing, or simulating scenes of sex with violence, including but not exclusively, mock rape, date rape, underage sex, bestiality, or any material deemed illegal in Spain

- Due to restrictions placed by VISA, we are also not allowed to show photographs of fisting on any site where access is gained by paying a fee using their cards.
